

## PICTURE HANGING SYSTEMS

### How much track do I need?

The track comes in 2m and 3m lengths, so measure your rooms and calculate the numbers of each length you will need to achieve your wall coverage. The track can be easily cut with a hacksaw to fill wall sections not fitting to the 2m & 3m increments.

We are happy to help you work out the most economical amount of track you will need. Call in with your rough measurements or your floor plans, or send us the details. If you need we can send our install team in to do an onsite measure-up for you.

### How do I install the track?

The track can be easily installed by a home handyman, requiring only a straight eye, hand tools and a drill.

We have an installation team who can install your track for you with minimum fuss. They are experienced in residential and corporate installation environments, and will always clean up after themselves. If you choose, you can purchase the track and leave it here until the installation date. Call us to book in your install. We charge installations at an hourly rate and can quote for you once we have an indication of your requirements.

### What kind of hooks will I need and how many?

Our range of hooks varies, as you would expect. If you have an idea of the size of your artworks and how many you want to hang, we can help you select the best ones for your job.

### I'm interested in lighting for my artworks, what should I do?

Many of our clients who want to light their artworks have chosen to install ceiling fitted down lights, or domestic track lighting. This allows them to use lighting suited to their room décor, while still having the control to direct the lighting to the hanging works.

The Gallery Hanging Track system has its own integrated lighting system with a hidden cord that fits within the track. As there are a number of different elements to this system, we would recommend making time to discuss with us what would work best for you.

## PICTURE HANGING SYSTEMS

Artitec system		
	Item number	Description
	WGAL AR Tk 2 primer/si/wh Artitec Track 2m. Comes in primer white or silver (includes 6 fittings)	The Click Rail is 25mm high and 8mm wide.
